The Problem Statement

- ▶ Context: Briefly describe the background of the field.
- ▶ The Gap: Current models fail to address X .

The Problem Statement

- ▶ Context: Briefly describe the background of the field.
- ▶ The Gap: Current models fail to address X .
- ▶ **Consequence:** This leads to significant errors in Y .

Methodology

Experimental Results

Conclusion

Our Contribution

Main Novelty

We introduce a hybrid framework that combines A and B .

- ▶ **Theoretical:** New proof for Z convergence.
- ▶ **Empirical:** Validated on a dataset of 10,000 samples.

Presentation Outline

Introduction

Methodology

Experimental Results

Conclusion

Mathematical Foundation

The system follows the update rule:

$$w_{t+1} = w_t - \eta \nabla \mathcal{L}(w_t) + \beta \underbrace{\int_0^\infty \psi(x) dx}_{\text{Spatial Regularization}} \quad (1)$$

Mathematical Foundation

The system follows the update rule:

$$w_{t+1} = w_t - \eta \nabla \mathcal{L}(w_t) + \beta \underbrace{\int_0^\infty \psi(x) dx}_{\text{Spatial Regularization}} \quad (1)$$

- ▶ η is the learning rate.
- ▶ $\psi(x)$ ensures our "Contribution" is mathematically sound.

Introduction

Our Contribution

Methodology

Experimental Results

Conclusion

Performance Analysis

- ▶ Accuracy increased by **12%**.
- ▶ Training time reduced by half.
- ▶ Robust against Gaussian noise.

Figure: Comparison vs SOTA

Benchmarking Table

Method	Recall	Precision	F1-Score
Old Model A	0.82	0.79	0.80
State-of-the-art	0.89	0.88	0.88
Proposed	0.94	0.93	0.93

Conclusion

Summary and Future Work

Summary:

- ▶ We bridged the gap between X and Y .
- ▶ Results prove efficiency in real-time environments.

Summary and Future Work

Summary:

- ▶ We bridged the gap between X and Y .
- ▶ Results prove efficiency in real-time environments.

Future Directions:

- ▶ Scaling the model to 3D environments.
- ▶ Deploying on edge devices.

Thank You!
